

## THE STYLE MATE

A Patented Adaptive Closet Tool for the Blind & Visually Impaired

Patent: US012333211B1

Business Entity: IMperfeKtlymade LLC

## WHAT IT IS

The Style Mate is a handheld, voice-activated clothing identification system designed for blind, low vision, and colorblind individuals who want to choose outfits quickly and independently.

## THE PROBLEM

Current methods fail:

- Safety-pin systems are confusing.
- Color identifiers misread colors and can't detect patterns or textures.
- Smart glasses require repeated scanning/questions.
- Relying on others removes independence.

## THE SOLUTION — THE STYLE MATE

A handheld device + waterproof sensor tags that store custom voice recordings describing each clothing item. Instant playback with no scanning delays.

## HOW IT WORKS

1. Point the Style Mate at a sensor.
2. Press Record and describe the item.
3. Attach the waterproof sensor to clothing.
4. Press Play later to hear the saved description.

## DEVICE FEATURES

- Fire TV–sized device
- Power, Record, Play, Volume buttons
- Fully tactile for blind/VI users

## SENSOR FEATURES

- Waterproof, laundry-safe sensor buttons
- Color-coded options
- Permanent voice recordings

## TARGET USERS

Blind adults, low vision individuals, colorblind users, seniors, teens, and anyone needing fast outfit identification.

## WHAT MAKES IT UNIQUE

- Custom descriptions in the user's own voice
- Instant results (no scanning or delays)
- Durable waterproof sensors
- Designed by a blind creator who understands the real problem

## CREDIBILITY & SOCIAL IMPACT

IMperfeKtlymade Foundation (for credibility only)

Website: [www.IMperfeKtlymade.com](http://www.IMperfeKtlymade.com)

Hosted three inclusive fashion shows with blind/VI models (latest: Nov 1, 2025).

Press, FOX 5 DC interview, and event videos available on website.
